

Conventional locks

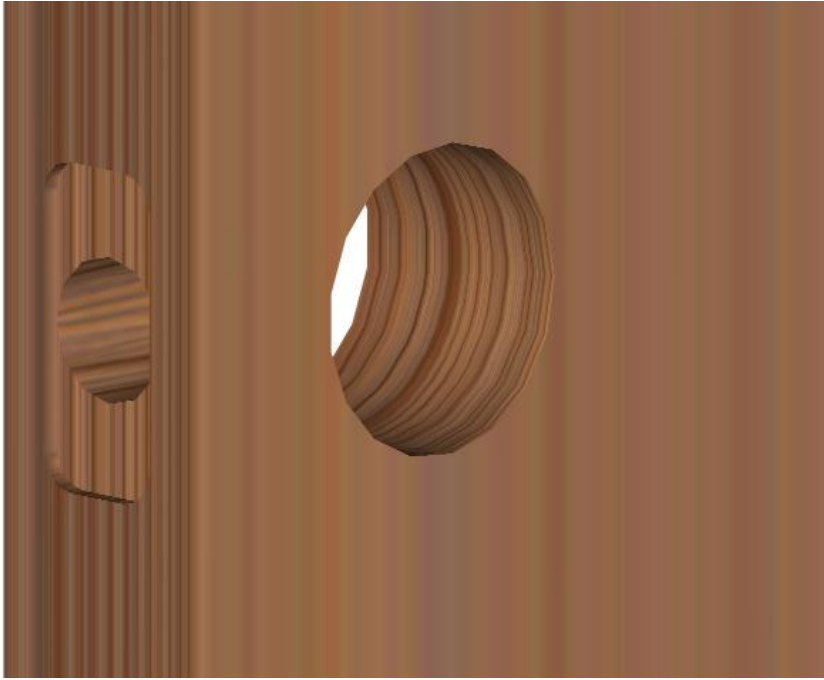

Conventional
Keyless Lock

Conventional locks are at just the right height to kick in doors.

Conventional locks

Steel Door

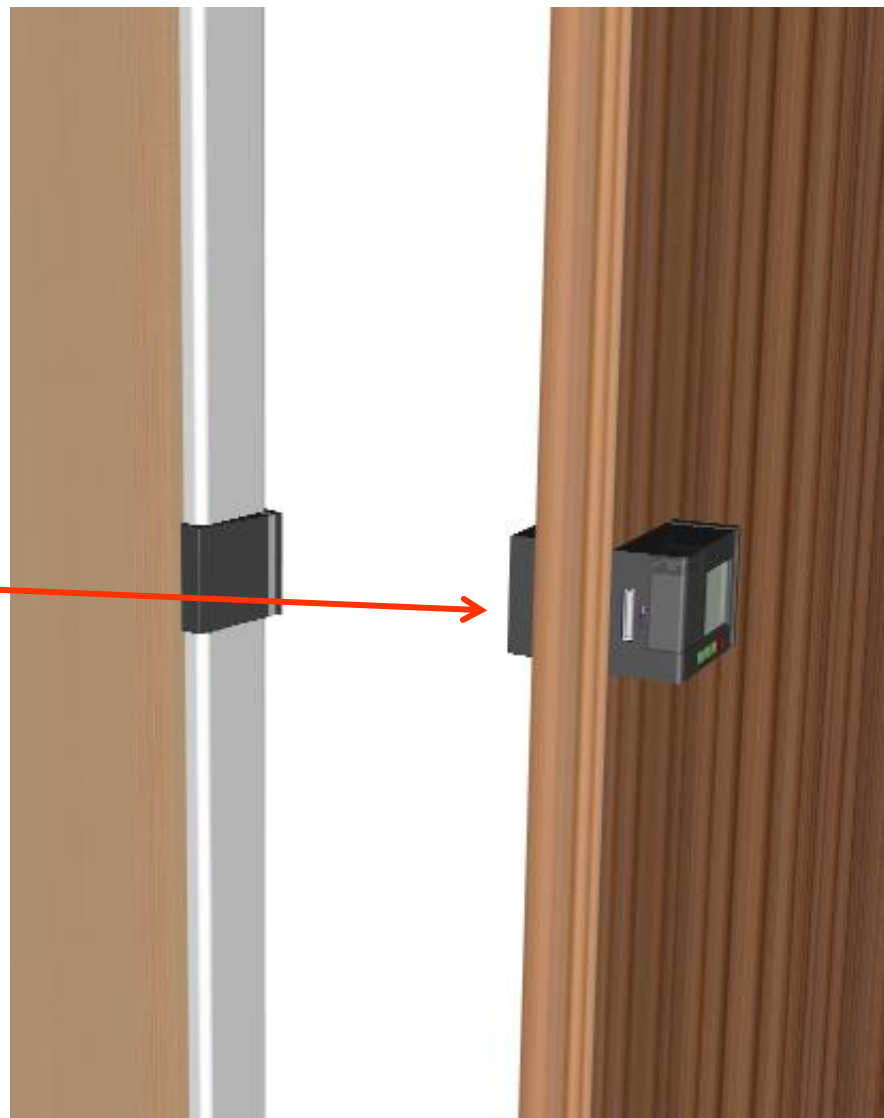

The two large holes required for installation weaken the door.

PRA's new concept in door security

PRA's new deadbolt lock is keyless and quick to operate.

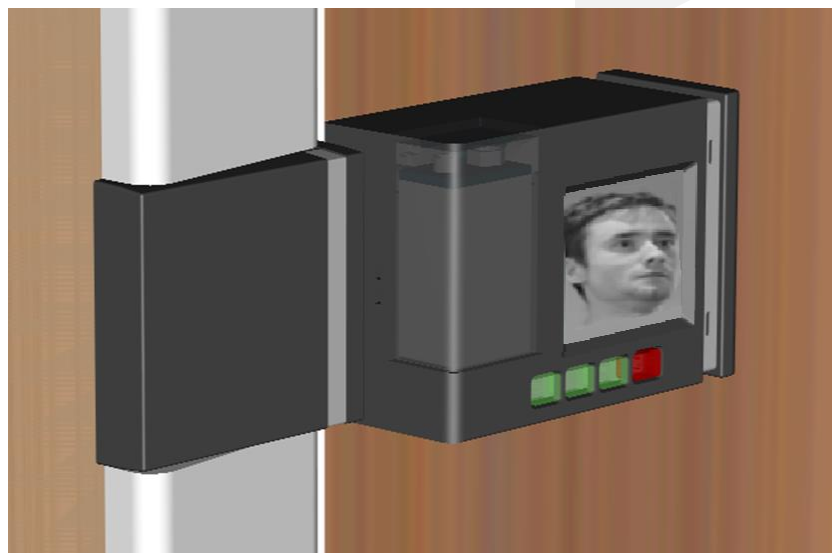

PRA's new lock concept

PRA's keyless touch pad is installed at a convenient height to use.

PRA's new lock concept

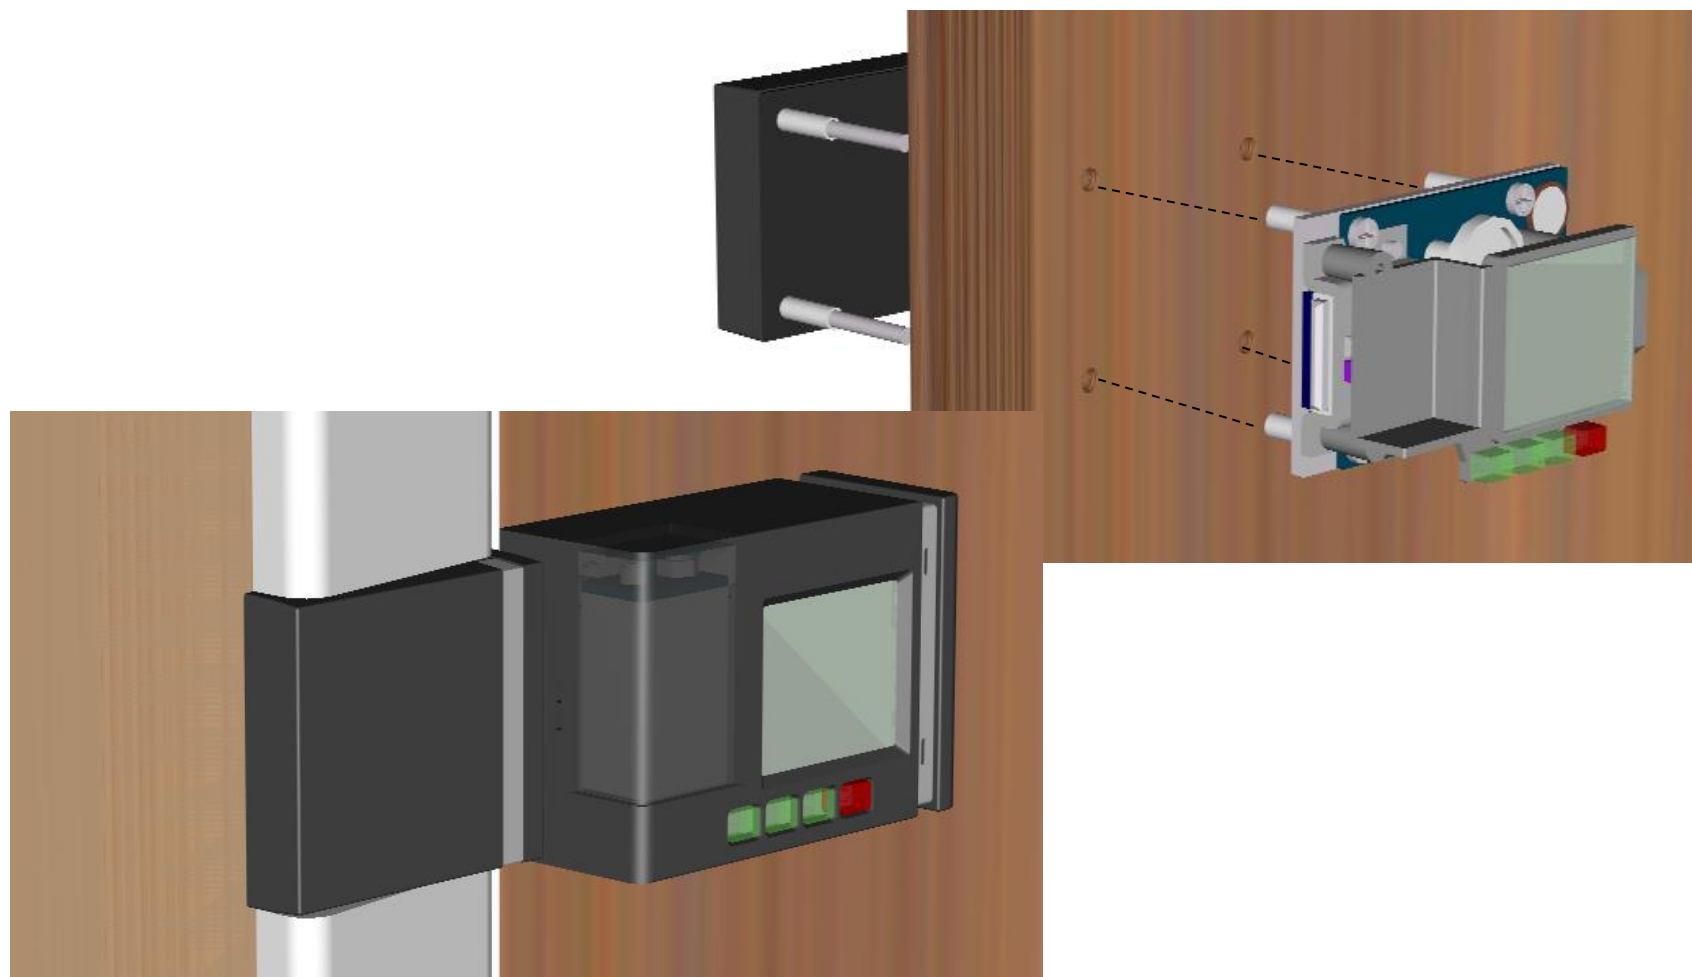

- Camera at an appropriate height

The height allows for easy viewing of callers . . .

PRA's new lock concept

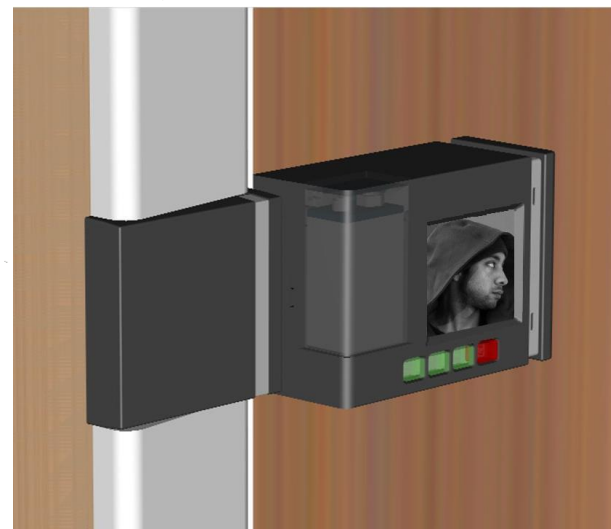

Four 1/4 in. holes

Installation with four small holes doesn't weaken the door.

PRA's new lock concept

- Camera captures image if door is tampered with?

A force-sensor in the lock triggers a camera in the keypad.

PRA's new lock concept

- Can automatically send image to a smart phone?

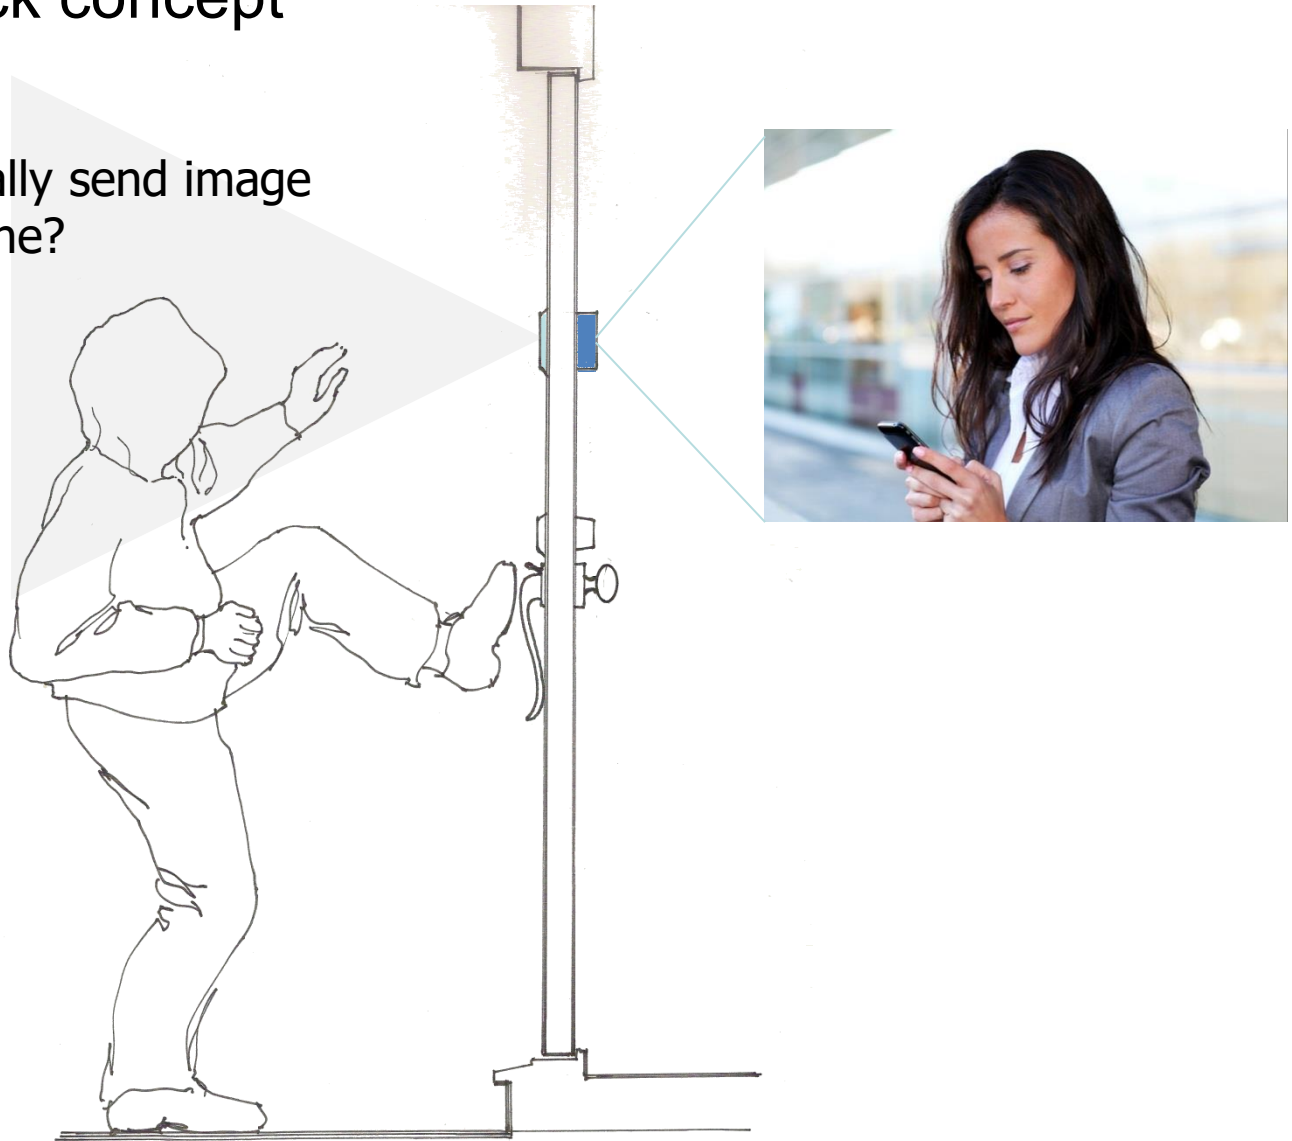

Photo is automatically sent to smartphone anywhere.

PRA's new lock concept

PRA is prepared to offer an exclusive license agreement.
